Is a Brownfields Grant right for your property?

Do you have an underutilized or vacant property?

Are you having trouble developing or selling because you need an ESA?

Do you suspect your property has been used as a dry cleaners, gas station, automotive-related business, or something else with a high chemical level?

A Brownfields Grant:

- ⇒ **Can make your property more attractive by removing potential environmental concerns.**
- ⇒ **Will reduce expenditures associated with due diligence prior to a transaction and serve as a selling point.**
- ⇒ **Has no contractual obligation required with the City or consulting firm.**
- ⇒ **Will NOT lead to enforced regulatory action against the property owner.**
- ⇒ **(if no containments found) Will provide signage to advertise your property deemed clean under the Brownfields program as well as advertise your property on the City's Available Properties list and Brownfields webpages.**

For more information, contact the Community and Economic Development Department at (228) 938-2351.
