Ref: Electrical Design/Engineering Proposal
Electrical services elevation at Marina and Park

Ms. Darcie Crew,

Welcon Electrical Consultants would like to offer a proposal for the electrical engineering and design services to raise the electrical services and metered connections at the marina on Pascagoula Street and River Park. Electrical design services are based on the preliminary discussions and site visit. The proposal is to include conceptual design and conceptual costs only, outlined by the following:

Marina:

1. Rework existing services at boat slips to elevate (24) power pedestals for electrical connections to boat slips.
2. Provide new elevated service point for (24) meters or ganged meter center. This may potentially be (2) locations. Location will be directed and coordinated with the city and may require land purchase.
3. Suggestions for rework or replacement of feeder conductors to each boat slip and new power pedestals for each.

Park:

1. Provide suggestions for raising (3-4) existing power pedestals in the park to minimize normal flood water intrusion.
2. Provide suggestions for splicing existing cables and elevating pedestals on galvanized stands or similar.

Items that may need further clarification or discussion, but have been excluded at this time include the following:

1. Prime bid documentation and contract management. This proposal includes providing electrical plans, details, specs, and documentation for electrical work only.
2. Details and specific construction documentation or construction approved drawings or specifications.

The electrical conceptual design and conceptual costs for this installation can be completed for a price of \$1,500.00 (One Thousand Five Hundred Dollars and no cents). Project will be invoiced upon delivery and acceptance of conceptual documents. Payment terms to be net 45.

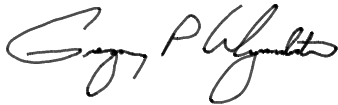

Deliverables will be written documentation, sketches, and preliminary construction estimates for proposed solutions. Proposed cut sheets with suggestions for installations.

If necessary, hourly rates are as follows:

| WORK DESCRIPTION | HOURLY RATE |
|------------------------|-------------|
| Principal Engineer | \$ 175.00 |
| Engineering and design | \$ 125.00 |
| CAD technician | \$ 75.00 |
| Site Inspection | \$ 125.00 |
| Meetings (Engineer) | \$ 125.00 |
| Administrative | \$ 50.00 |

If you have any questions, please advise.

Respectfully,

Gregory P. "Greg" Wyrosdick, PE
