

Littering Campaign

The Pascagoula Police Department has done excellent work starting to layout the next steps for addressing litter removal in the community. COVID-19 held back some of our scheduling plans for implementing new litter removal strategies to help improve community appearance. Below are a few of the items the Police Department is starting to address regarding our littering campaign:

- Having citizens that are unable to pay fines work with the Police Department on cleaning up designated areas. This program was in effect prior to the COVID-19 outbreak and was successful.
- Posting litter signs around the community letting folks know that littering will not be tolerated. There will be a fine assessed for citizens that are caught littering
- Reaching out to different stakeholders to determine their interest in participating in litter cleanup events.
- Starting to work on a campaign marketing strategy to get the anti-littering message out to the community.
